Why **Track with Akuratemp**

Digitize fixed and mobile assets to manage inventory with reverse logistics.

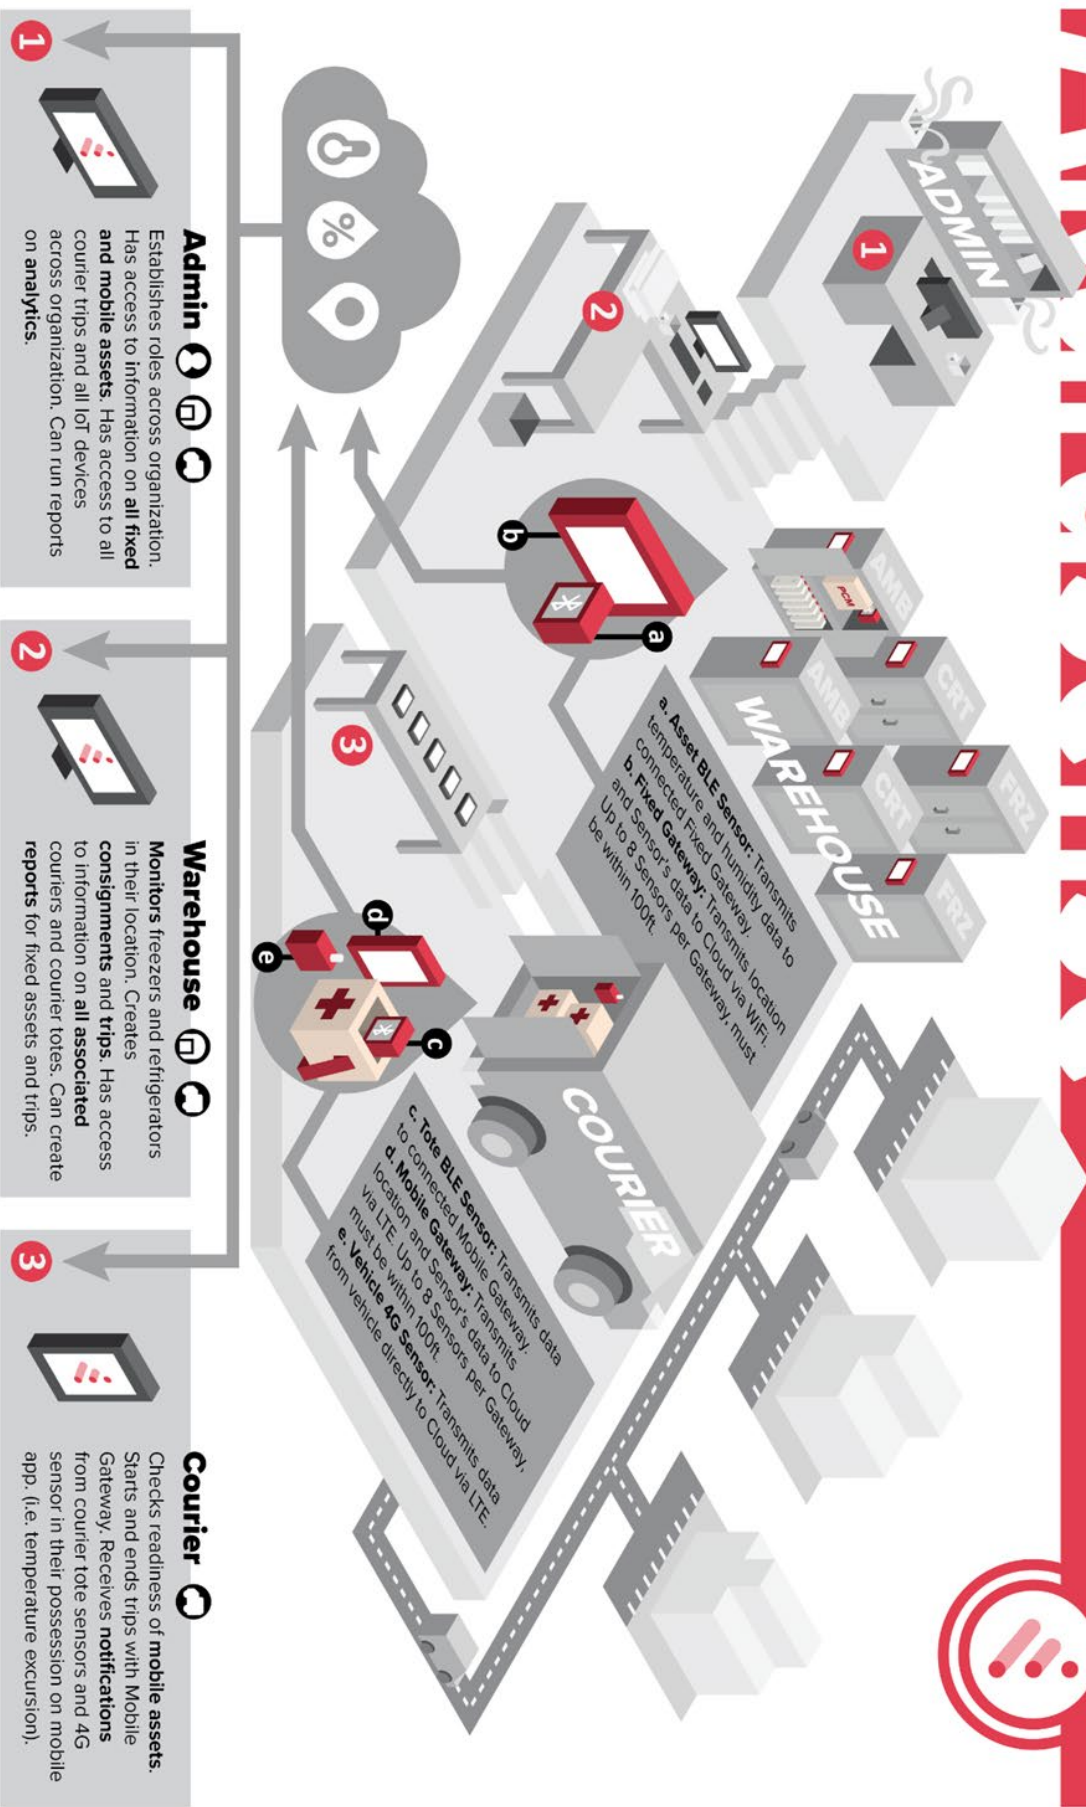

Configure smart notifications to minimize operational non-conformance.

Fully configurable software platform to manage multi-location fleet.

Built in Business Intelligence Analytics for continuous improvement and risk reduction.

Akuratemp

Akuratemp's cloud-based IoT-enabled Temperature, Humidity and Location Monitoring System

Admin 1
Establishes roles across organization. Has access to information on **all fixed and mobile assets**. Has access to all courier trips and all IoT devices across organization. Can run reports on **analytics**.

Warehouse 2
Monitors freezers and refrigerators in their location. Creates **consignments and trips**. Has access to information on **all associated** couriers and courier totes. Can create reports for fixed assets and trips.

Courier 3
Checks readiness of **mobile assets**. Starts and ends trips with Mobile Gateway. Receives **notifications** from courier tote sensors and 4G sensor in their possession on mobile app. (i.e. temperature excursion).
